## Policy push could help India tap 8-10% of global semiconductor demand, says IESA

Ashok Chandak, President of the India Electronics and Semiconductor Association (IESA), said that the approved projects together have the potential to create a capacity of nearly 80 million chips per day once fully operational.

By Parikshit Luthra X

August 25, 2025, 9:58:54 PM IST (Published)

🕒 2 Min Read

India's semiconductor market is poised for a transformational decade, with industry leaders projecting it to surpass \$100 billion by 2030. According to a report by the India Electronics and Semiconductor Association (IESA), the country could cater to nearly 8–10% of global demand, amounting to \$40 billion, if policy momentum and execution continue at pace.

Ashok Chandak, President of IESA, highlighted that India has already made significant progress under the Semicon India programme but stressed that the sector requires long-term support.

“It is very clear that the semiconductor industry is a long haul. One programme or a few years of efforts is just the beginning and a starting point... this programme needs to continue for an additional five to ten years minimum, so that it becomes more impactful and self-sustainable in the future,” he said.

Chandak underlined that the next phase, dubbed “Semicon 2.0,” must expand its scope. “The previous one was \$10 billion. Equal or more would be welcome, surely. And also the expectation is that this time, it could cover the wider range of topics, including the supply chains, particularly materials, chemicals, and gases.”

On the design front, Chandak pointed out that India already accounts for nearly 20% of the global semiconductor design workforce. He noted that more than 300 institutes now have access to electronic design automation tools under the government’s design-linked incentive scheme, calling it “one of the world’s largest government-supported programmes.”

Despite geopolitical uncertainties, Chandak maintained that India must adopt a balanced global approach.

“No country is able to fulfil 100% of its value chain and demand on its own. We need to establish proof points by executing our currently announced projects... and build interdependence with multiple countries,” he said, citing active interest from global players in the upcoming Semicon India 2025 event.

On capacity creation, Chandak revealed that 10 central government-approved projects and several state-supported initiatives are already underway. “All these projects put together, there is a capacity of about 80 million chips per day... at least three plants would be in pilot production this year,” he said, adding that full-scale operations could enable India to produce 70–72 million chips daily within the next two years.

**SUMMIT DAS GUPTA**  
New Delhi, 28 August

On September 2, over 500 companies and 1,000 delegates from 25 countries will descend on New Delhi to showcase their semiconductor prowess at Semicon India — one of the country's largest business-to-business, or B2B, gatherings. Among them will be top executives of global semiconductor majors such as Applied Materials, Infineon, SK Hynix, Powerchip Semiconductor Manufacturing Corporation (PSMC), IBM, Renesas, ASML, Micron, Tokyo Electronics, and Lam Research.

Four countries that are key players in the semiconductor ecosystem — Singapore, South Korea, Japan, and Malaysia — will be present in India from their pavilions. Also present will be an Indian state government — Karnataka, Tamil Nadu, Odisha, Gujarat, Andhra Pradesh, Chhattisgarh, Haryana, Uttar Pradesh, Madhya Pradesh, and Assam — to showcase their semiconductor policies and incentives to woo potential investors.

India is a late entrant to the silicon party, scoring barely three, out of a full 100, on the road ahead last year.

**ASHOK CHANDAK, PRESIDENT OF THE INDIA ELECTRONICS AND SEMICONDUCTOR ASSOCIATION, PROJECTS THAT WITH THE MARKET TOUCHING OVER \$500 BILLION BY 2030, INDIA WILL ACCOUNT FOR 8-10 PER CENT OF THE ESTIMATED \$1 TRILLION GLOBAL CHIP SALES.**

## In the circuit

India aspires to be among the world's top five semiconductor countries. The road is long

In December 2021, under the India Semiconductor Mission, the government offered a subsidy of \$50 billion to kickstart the domestic industry.

The good news is that the money has already been committed to a host of projects and disbursements have begun. This has helped India attract investments of over \$10 billion. That is 2.5 per cent of the total global spending on semiconductor plants under construction.

With all project start-up, including the ones which have started, India will have the capacity to produce 60 million chips per die, which is a good start.

Many of these projects will begin commercial production by the end of December. An example is the Micron made in India chip.

However, even for one mega fab (10,000 sqm) fabrication plant, by the time which is under construction it might be positioned in 2027-28. India is still in the early stages of semiconductor Assembly and Test (OSAT), and Assembly, Test/Ink, and Packaging (ATP).

cost) is to remain for four mega fabs alone, it will require another \$100 billion at least. With the government planning to subsidise the semiconductor ecosystem — such as gas and chemical players, and machine makers — a lot more money would be required.

This might, however, not be an insurmountable challenge.

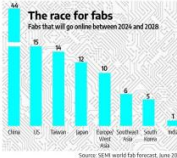

According to reports, Japanese Prime Minister Shinzo Abe is likely to announce the doubling of Japan's investment in India when Prime Minister Narendra Modi arrives in Tokyo on August 30. He has proposed an investment of \$80 billion over the next decade, and semiconductor are expected to be one of the areas of cooperation.

In the ATMP/OSAT space, India is still in its infancy. It is a 10 per cent share of the global market but is still in its infancy. With many of the companies shifting part of their business from Malaysia to India, Taiwanese firms looking to hedge their bets, and with five such firms already under construction in India, the target appears achievable.

India, of course, does not want to be just an OEM player. It expects to be among the top five semiconductor countries of the world. If that aspiration is to be realised, the next few years will be crucial.

When it comes to demand, the country is an important destination for semiconductor products. Ashok Chandak, president of the India Electronics and Semiconductor Association (IESA), projects that with the market touching over \$500 billion by 2030, India will account for 8-10 per cent of the estimated \$1 trillion global chip sales.

However, in terms of producing wafers in fabrication plants, a lot of ground needs to be covered.

Most countries are working on building them domestically. Many are offering mega subsidies to attract big fabrication players. Between the US, China, EU, Japan, South Korea, and Taiwan, these subsidies account for over \$388 billion.

There is a reason India has to seriously get into the game.

The strategic importance of semiconductors came to the fore when a huge chip shortage confronted the world during the pandemic. It exposed how overdependence on the few countries manufacturing chips could adversely impact broad swathes of the industry — from automobiles to consumer electronics such as mobile phones and personal computers.

The growing protectionism and weaponisation of chip trade by countries such as the US has only heightened this concern.

Says Ajit Manocha, president and chief executive officer of California-based SEMI, one of the largest organisations of the industry: "Countries are now realising that they need semiconductors not only for national security but also for economic prosperity."

**A late entrant, but...**  
India has made a well thought-out but cautious entry into the semiconductors.

which over seven projects have been cleared, including by states.

One reason is that these plants require far less investment, and the rollout is both faster and less complex.

**The catch-up game**  
That said, given the global race for semiconductors, India will need to step on the gas to catch up.

Last year, electronics and information technology minister Ashwini Vaishnaw said that in the next five years, India would look for 4-6 more fab plants, 6-10 compound semiconductor plants, and 8-10 ATMP plants. He wants India to hold 10 per cent of the global OSAT and ATMP market, which is dominated by Taiwan (40 per cent) and Malaysia (14 per cent).

It's an ambitious goal, considering that India has just about started out. Global players like TSMC, the Taiwanese multinational semiconductor contract manufacturing and design company, are already investing billions of dollars in their own country, or in the US, or Europe, or wherever the semiconductor ecosystem is mature.

SEMI's latest global forecast, in June, indicates that between 2024 and 2028, 107 new fab plants will go online, and by 2030, another 30 will be needed to meet the growing demand presented by artificial intelligence. By then, global semiconductor sales will double to 1.2 trillion.

While India currently has only one mega fab plant under construction, China has 44, Japan 12, Taiwan 14, Europe 10, and US 15, according to SEMI.

India's subsidy also pales by comparison. China is putting in a staggering \$200 billion and the EU \$47 billion. South Korea is offering \$35 billion in tax incentives, and the US is promising \$52 bil-

## ગુજરાત સેમી...

વૈશ્વિક સ્તરે આત્મનિર્ભર બનવા સાથે ગુણવત્તાને પ્રાધાન્ય આપી આ સેગમેન્ટમાં મોટા પાયે કામગીરી થઈ રહી છે. વર્ષ 2032 સુધીમાં દેશમાં 100 અબજ ડોલરનો સેમીકંડક્ટર ચીપનો વપરાશ હશે તેને પહોંચી વળવા ઝડપથી આગળ વધી રહ્યાં હોવાનું ઈલેક્ટ્રોનિક્સ અને આઈટી મિનિસ્ટર અશ્વિની વૈશ્ણવે દર્શાવ્યું હતું. સીજીપાવરના ચેરમેન વલ્લેલાન સુબ્બેશાએ જણાવ્યું કે ગુજરાતની મજબૂત ઈકોસીસ્ટમને ધ્યાનમાં લેતા માત્ર દોઢ વર્ષના ટૂંકાગાળામાં આ શક્ય બન્યું છે. અત્યારે પહેલા તબક્કામાં પાંચ લાખ ચીપ અને ફુઝ કેઈઝ સુધીમાં દૈનિક ધોરણે 15 લાઈન સુધી પહોંચશે.

મેડ ઈન ઈન્ડિયા, મેક ઈન ઈન્ડિયા ચિપ ભારતને આત્મનિર્ભર બનાવશે. ભારત ગ્લોબલ સપ્લાય ચેઈનની મજબૂતી માટે કામ કરે છે. જેમાં સેમિકંડક્ટર મેન્યુફેક્ચરિંગ હબ બનવા માટે ગુજરાતે આગેવાની લીધી છે તેવો નિર્દેશ ગુજરાતના મુખ્યમંત્રી ભૂપેન્દ્રભાઈ પટેલે દર્શાવ્યો હતો. સેમી કંડક્ટરમાં દેશમાં ગુજરાતમાં પહેલી પોલિસી બની હતી અને પહેલી ચીપ પણ દેશને ગુજરાત આપશે.

દેશભરમાં અત્યાર સુધીમાં સરેરાશ 10 પ્રોજેક્ટરની રજૂઆત થઈ છે જેમાં 4-5 પ્રોજેક્ટ ગુજરાતમાં છે એટલું જ નહિ ચીપ મેન્યુફેક્ચરિંગની પાઈલટ લાઈન શરૂ થઈ છે. આગામી એકાદ વર્ષમાં માઈક્રોન અને કેઈન્સ સેમિકોન સાઈડ પ્લાન્ટમાંથી ચીપ રજૂ કરશે.

## First 'Made-In-India' chip to be rolled out soon, says Vaishnaw

**Ahmedabad:** The first Made-In-India semiconductor chip will be rolled out soon from CG Semi's pilot line in Sanand, said Union electronics and information technology minister Ashwini Vaishnaw on Thursday. He also said that the govt is taking steps to ensure talent pool for this new industry.

Addressing a gathering at the inauguration of pilot line of CG Semi's plant in Sanand GIDC, Vaishnaw said, "The pilot line was inaugurated here today, and very soon, the chip produced from this pilot line will be dedicated to the nation by the prime minister. A total of 10 plants has been approved under the Semiconductor Mission and all are going ahead with good speed. CG Semi has started a pilot

Union minister Ashwini Vaishnaw during the inauguration of CG Semi's OSAT facility at Sanand on Thursday

line which is crucial and the commercial production will start in 2026. The chips will be used in auto, consumer goods, etc. All four companies in Gujarat are seeing development at a fast pace. We are taking steps at university level to ensure a quality talent pool for the industry."

Gujarat Chief Minister Bhupendra Patel said, "Gujarat announced the country's first semiconductor policy in 2022 and is the only state which has four semiconductor plants in progress which are approved under the Semiconductor Mission. Indian economy is growing rapidly and global rating agencies are upgrading our ranking. Chips made in Gujarat will help the country move in the direction of becoming self-reliant."

Verlaten Subbiah, chairman of CG Power, said, "We will start commercial production in 2026 and the plant will reach its full capacity of 14.5 million units per day in 2027."

સેમિ કંડક્ટરમાં પહેલી ચીપ ગુજરાતથી, દેશમાં ગુજરાત માર્કેટ લીડર બનશે

**1.26 લાખ કરોડ રૂપિયાનું રોકાણ  
ગુજરાતમાં અત્યાર સુધીમાં આવ્યું**

- 7600 કરોડનું રોકાણ સીજી પાવરે કર્યું
- 5000 લોકોને સીજી પાવર રોજગારી આપશે
- 5 લાખ પ્રતિ દિવસ ઉત્પાદન પહેલા તબક્કામાં

## ગુજરાત સેમિ કંડક્ટર ‘ચીફ’

■ સીજી પાવરે પાઈલટ લાઈનની શરૂઆત કરી, ટૂંકમાં કોમર્શિયલ

ભાસ્કર ન્યૂઝ | રામદેવજી

અમદાવાદ નજીક સાણંદ ખાતે પ્લાન્ટ ધરાવનાર સેમિકન્ડક્ટર કંપની સીજી સેમિ ટૂંક સમયમાં ભારતમાં નિર્મિત પ્રથમ ચીપનું ઉત્પાદન કરશે. ગુરુવારે કેન્દ્રીય મંત્રી અશ્વિની વૈષ્ણવે પ્લાન્ટની મુલાકાત બાદ આ જાણકારી આપી હતી. કેન્દ્રીય મંત્રી વૈષ્ણવ તથા રાજ્યના મુખ્યમંત્રી ભુપેન્દ્ર પટેલે સીજી સેમિના પ્લાન્ટનું ઉદઘાટન કર્યું હતું. આ પ્લાન્ટ રોજની 5 લાખ ચીપનું ઉત્પાદન કરવાની ક્ષમતા ધરાવશે. કેન્દ્ર તથા રાજ્ય સરકારના સહકારથી કંપની આગામી પાંચ વર્ષમાં 7,600 કરોડના રોકાણ સાથે જીવન અને જીન્ડ્ર એમ બે ફેસિલિટી ડેવલપ કરશે.

સેમિકન્ડક્ટર ક્ષેત્રે દેશભરમાં અત્યાર સુધીમાં 10 પ્રોજેક્ટને મંજૂરી આપવામાં આવી છે જેમાંથી ચાર પ્રોજેક્ટ ગુજરાતમાં છે. કોમર્શિયલમાં પહેલી ચીપ ગુજરાતથી રજૂ કરશે. ...અનુસંધાન પાના નં. 11

### ભાસ્કર નોલેજ

**દેશમાં ગુજરાતમાં સૌ પહેલા  
સેમિકંડક્ટર પોલિસી ઘડાઈ અને  
ચાર સેમિકંડક્ટર પ્લાન્ટને મંજૂરી**

- ગુજરાતમાં સાણંદ સ્થિત સીજી પાવરે પાઈલટ લાઈન શરૂ કરી. કોમર્શિયલ સેગમેન્ટમાં પહેલી ચીપ રજૂ કરાશે.
- સેમી કંડક્ટરની ચીપ દરેક ઇલેક્ટ્રોનિક ડિવાઈસીસ જેમકે મોબાઈલ, લેપટોપ, કમ્પ્યુટર, ઓટો સેક્ટર, એઆઈ સર્વર તથા ડ્રોન ટેકનોલોજીમાં કામ લાગશે.
- આ સેગમેન્ટમાં સિકલ વર્કફોર્સ માટે 270 યુનિવર્સિટીમાં ટેકનોલોજી સાધનો પુરા પાડ્યા છે.
- 20 ચીપની ડિઝાઈન વિદ્યાર્થીઓ દ્વારા તૈયાર કરાઈ છે જેનું ટેસ્ટિંગ થઈ રહ્યું છે.
- દેશની ચીપ કોસ્ટ ઇફેક્ટિવ સાથે ગુણવત્તાને પ્રાધાન્ય આપનારી રહેશે

## ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಘಟಕಗಳ ಜಾರಿಗೆ ಶಿಫಾರಸ್ಸು

■ ಪ್ರಜಾವಾಹಿನಿ-ಬೆಂಗಳೂರು

ಕರ್ನಾಟಕದಲ್ಲಿ ವಿದ್ಯುನ್ಮಾನ ಉಪಕರಣಗಳ ವಿನ್ಯಾಸ ಮತ್ತು ಉತ್ಪಾದನೆ ವಲಯವನ್ನು ಮುನ್ನಡೆಸುವಲ್ಲಿ ಐಇಎಸ್‌ಎ ಸದಸ್ಯರು ಮಹತ್ವದ ಕೊಡುಗೆ ನೀಡುತ್ತಿದ್ದಾರೆ. ಎಸ್‌ಇಎಂಐ ಜೊತೆಗಿನ ನಮ್ಮ ಮೈತ್ರಿಯ ಮೂಲಕ, ಕರ್ನಾಟಕದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಮತ್ತು ಸೆಮಿಕಂಡಕ್ಟರ್ ಉಪಕ್ರಮಗಳಿಗೆ ಜಾಗತಿಕಗೊಳಿಸಲು ನಾವು ಸಜ್ಜಾಗಿದ್ದೇವೆ ಎಂದು ಇಂಡಿಯನ್ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಆಂಡ್ ಸೆಮಿಕಂಡಕ್ಟರ್ ಅಸೋಸಿಯೇಷನ್ (ಐಇಎಸ್‌ಎ) ಅಧ್ಯಕ್ಷ ಅಶೋಕ್ ಚಂದಕ್ ಹೇಳಿದ್ದಾರೆ.

ಮುಖ್ಯಮಂತ್ರಿ ಸಿದ್ದರಾಮಯ್ಯ ಹಾಗೂ ಸಚಿವರೊಂದಿಗೆ ನಡೆದ ಕೈಗಾರಿಕಾ ಉಪಹಾರ ಸಭೆಯಲ್ಲಿ ಭಾಗವಹಿಸಿ ಮಾತನಾಡಿರುವ ಅವರು, ಮೈಸೂರಿನಲ್ಲಿ ಪಿಸಿಬಿ ಪಾರ್ಕ್ ತ್ವರಿತಗೊಳಿಸಲು, ಐಇಎಸ್‌ಎಯ ಸ್ಟಾರ್ಟ್-ಅಪ್ ಮಿತ್ರ ಉಪಕ್ರಮವನ್ನು ಬೆಂಬಲಿಸಲು, ಮೀಸಲಾದ ಆರ್ ಅಂಡ್ ಡಿ ನಿಧಿಯನ್ನು ಹಂಚಿಕೆ ಮಾಡಲು, ತ್ವರಿತವಾಗಿ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಘಟಕಗಳ ಯೋಜನೆಗಳು ಸೇರಿದಂತೆ ಇನ್ನೂ ಹಲವನ್ನು ಜಾರಿಗೆ ತರಲು ನಾವು ಕರ್ನಾಟಕ ಸರ್ಕಾರಕ್ಕೆ ಶಿಫಾರಸ್ಸು ಮಾಡಿದ್ದೇವೆ. ಇವೆಲ್ಲವೂ ರಾಜ್ಯದಲ್ಲಿ ನಾವೀನ್ಯತೆ, ಉತ್ಪಾದನೆ ಮತ್ತು ವೃದ್ಧಿ ಸೃಷ್ಟಿಯನ್ನು ವೇಗಗೊಳಿಸುವ ಗುರಿಯನ್ನು ಹೊಂದಿವೆ ಎಂದು ಹೇಳಿದ್ದಾರೆ.

## Hon'ble PM Shri. Narendra Modi to inaugurate fourth edition of SEMICON® India 2025

NEW DELHI: The fourth edition of SEMICON India 2025 will be officially inaugurated by Hon'ble Prime Minister Shri. Narendra Modi on 2nd September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi. Staying true to its legacy of positioning India as a global Semiconductor powerhouse, the fourth edition of SEMICON India 2025 will

convene key stakeholders including global leaders, semiconductor industry experts, academia, government officials and students. Accelerating India's semiconductor revolution, SEMI, the global industry association prompting the semiconductor industry and India Semiconductor Mission (ISM), Ministry of Electronics and Information Technology (MeitY), announced the programming for SEMICON India 2025 at a press conference held in the national capital today. India's semiconductor industry is poised for a breakthrough, with domestic policies and private sector capacity finally aligning to propel the nation to global prominence. said Ashok Chandak, President, SEMI India and IESA. Registration is OPEN. The SEMICON India exhibition will feature nearly 350 exhibitors from across the global semiconductor value chain including 6 county Round Tables, 4 country pavilions, 9 states participations and over 15000 expected said Shri S Krishnan, Secretary, MeitY.

## દેશનું સૌથી મોટું સેમિકન્ડક્ટર અને ઇલેક્ટ્રોનિક્સ શો રથી ૪ સપ્ટેમ્બર, ૨૦૨૫ દરમિયાન નવી દિલ્હીમાં યોજાશે

SEMICON India ૨૦૨૫નું ચોથું સંસ્કરણ ૨ સપ્ટેમ્બર, ૨૦૨૫એ નવી દિલ્હીના યશોભૂમિ (ઇન્ડિયા ઇન્ટરનેશનલ કન્વેન્શન એન્ડ એક્સપો સેન્ટર) ખાતે માનનીય પ્રધાનમંત્રી શ્રી નરેન્દ્ર મોદી દ્વારા સત્તાવાર રીતે ઉદ્ઘાટિત કરવામાં આવશે. ભારતને વૈશ્વિક સેમિકન્ડક્ટર પાવરહાઉસ તરીકે સ્થાન આપવાની પરંપરાને આગળ ધપાવતા SEMICON India ૨૦૨૫ વૈશ્વિક નેતાઓ, સેમિકન્ડક્ટર ઉદ્યોગના નિષ્ણાતો, શૈક્ષણિક જગત, સરકારી અધિકારીઓ અને વિદ્યાર્થીઓને એક સાથે લાવશે. ભારતના સેમિકન્ડક્ટર ક્રાંતિને ગતિ આપતા, SEMI (વૈશ્વિક

સેમિકન્ડક્ટર ઉદ્યોગ સંસ્થા) અને ઇન્ડિયા સેમિકન્ડક્ટર મિશન (ISM), ઇલેક્ટ્રોનિક્સ અને માહિતી પ્રૌદ્યોગિકી મંત્રાલય (MeitY) એ આજે નવી દિલ્હીમાં યોજાયેલી પત્રકાર પરિષદમાં SEMICON India ૨૦૨૫ના કાર્યક્રમની જાહેરાત કરી. રજિસ્ટ્રેશન હાલ ખુલ્લું છે.

૨૮૦થી વધુ શૈક્ષણિક સંસ્થાઓ અને ૭૨ સ્ટાર્ટઅપ્સને આધુનિક ડિઝાઇન ટૂલ્સ ઉપલબ્ધ કરાવવામાં આવ્યા, જેમાંથી ૨૩ સ્ટાર્ટઅપ્સને DLI યોજનામાં મંજૂરી મળી

CCTV સિસ્ટમ્સ, નેવિગેશન ચિપ્સ, મોટર કન્ટ્રોલર્સ, કોમ્યુનિકેશન ડિવાઇસીસ અને માઇક્રોપ્રોસેસર્સ જેવા મહત્વપૂર્ણ

ક્ષેત્રોમાં નવા અવલોકનોને આગળ ધપાવવું

થીમ — Building the Next Semiconductro Powerhouse હેઠળ, ઇવેન્ટમાં Fabs, એડવાન્સ્ડ પેકેજિંગ, સ્માર્ટ મેન્યુફેક્ચરિંગ, ઈ, સપ્લાય ચેઇન મેનેજમેન્ટ, સસ્ટેનેબિલિટી, વર્કફોર્સ ડેવલપમેન્ટ, ડિઝાઇન અને સ્ટાર્ટઅપ્સ જેવા ક્ષેત્રોમાં નવા ઇનોવેશન અને ટ્રેન્ડ્સ અંગે ઊંડા અવલોકનો મળશે. આ માટે ઉચ્ચ સ્તરીય કી-નોટ ભાષણો, પેનલ ચર્ચાઓ, ફાયર સાઇડ ચેટ્સ, પેપર પ્રેઝન્ટેશન્સ, ૬ આંતરરાષ્ટ્રીય રાઉન્ડટેબલ્સ અને બીજા અનેક કાર્યક્રમો યોજાશે.

## દેશનું સૌથી મોટું સેમિકન્ડક્ટર અને ઇલેક્ટ્રોનિક્સ શો રથી ૪ સપ્ટેમ્બર, ૨૦૨૫ દરમિયાન નવી દિલ્હીમાં યોજાશે

નવી દિલ્હી, ૨૨ ઓગસ્ટ, ૨૦૨૫: **SEMICON India 2025**નું ચોથું સંસ્કરણ ૨ સપ્ટેમ્બર, ૨૦૨૫એ નવી દિલ્હીના યશોભૂમિ (ઇન્ડિયા ઇન્ટરનેશનલ કન્વેન્શન એન્ડ એક્સ્પો સેન્ટર) ખાતે માનનીય પ્રધાનમંત્રી શ્રી નરેન્દ્ર મોદી દ્વારા સત્તાવાર રીતે ઉદ્ઘાટિત કરવામાં આવશે. ભારતને વૈશ્વિક સેમિકન્ડક્ટર પાવરહાઉસ તરીકે સ્થાન આપવાની પરંપરાને આગળ ધપાવતા જીઈસીઈડ્રી હક્કેટ ૨૦૨૫ વૈશ્વિક નેતાઓ, સેમિકન્ડક્ટર ઉદ્યોગના નિષ્ણાતો, શૈક્ષણિક જગત, સરકારી અધિકારીઓ અને વિદ્યાર્થીઓને એક સાથે લાવશે. ભારતના સેમિકન્ડક્ટર ક્રાંતિને ગતિ આપતા, SEMI (વૈશ્વિક સેમિકન્ડક્ટર ઉદ્યોગ સંસ્થા) અને ઇન્ડિયા સેમિકન્ડક્ટર મિશન (ISM), ઇલેક્ટ્રોનિક્સ અને માહિતી પ્રૌદ્યોગિકી મંત્રાલય (MeitY) એ આજે નવી દિલ્હીમાં યોજાયેલી પત્રકાર પરિષદમાં જીઈસીઈડ્રી હક્કેટ ૨૦૨૫ના કાર્યક્રમની જાહેરાત કરી. રજિસ્ટ્રેશન હાલ ખુલ્લું છે.

ભારતના ‘આત્મનિર્ભર ભારત’ના સફરમાં શક્તિ પૂરતા **SEMICON India**ના કાર્યક્રમો:

હાર્થ-વોલ્યુમ ફેબ્સ, ૩૬ હેટરોજેનિયસ પેકેજિંગ, કમ્પાઉન્ડ

સેમિકન્ડક્ટર્સ (SIC સહિત) અને OSATs શોર્સ ૧૦ વ્યૂહાત્મક પ્રોજેક્ટ્સને મંજૂરી

૨૮૦થી વધુ શૈક્ષણિક સંસ્થાઓ અને ૭૨ સ્ટાર્ટઅપ્સને આધુનિક ડિઝાઇન ટૂલ્સ ઉપલબ્ધ કરાવવામાં આવ્યા, જેમાંથી ૨૩ સ્ટાર્ટઅપ્સને DLI યોજનામાં મંજૂરી મળી CCTV સિસ્ટમ્સ, નેવિગેશન ચિપ્સ, મોટર કન્ટ્રોલર્સ, કોમ્યુનિકેશન ડિવાઇસીસ અને માઈક્રોપ્રોસેસર્સ જેવા મહત્વપૂર્ણ શોર્સમાં નવા અવલોકનોને આગળ ધપાવવું

**ધીમ – Building the Next Semiconductor Powerhouse** હેઠળ, ઇવેન્ટમાં **Fabs**, એડવાન્સ્ડ પેકેજિંગ, સ્માર્ટ મેન્યુફેક્ચરિંગ, ઈ, સપ્લાય ચેઇન મેનેજમેન્ટ, સસ્ટેનેબિલિટી, વર્કફોર્સ ડેવલપમેન્ટ, ડિઝાઇન્સ અને સ્ટાર્ટઅપ્સ જેવા શોર્સમાં નવા ઇનોવેશન અને ટ્રેન્ડ્સ અંગે ઊંડા અવલોકનો મળશે. આ માટે ઉચ્ચ સ્તરીય કી-નોટ ભાષણો, પેનલ ચર્ચાઓ, ફાયર સાઈડ ચેટ્સ, પેપર પ્રેઝન્ટેશન્સ, ૬ આંતરરાષ્ટ્રીય રાઉન્ડટેબલ્સ અને બીજા અનેક કાર્યક્રમો યોજાશે.

ઇવેન્ટ હાર્થલાઈટ્સ:

૫૦+ વૈશ્વિક વિજનરી સ્પીક્સ

વૈશ્વિક સેમિકન્ડક્ટર વેલ્યુ ચેઇનમાંથી ૩૫૦+ પ્રદર્શકો ૬ આંતરરાષ્ટ્રીય કન્ડ્રી રાઉન્ડટેબલ્સ અને ૪ કન્ડ્રી પેવેલિયન્સ

૮ ભારતીય રાજ્યોની ભાગીદારી

૧૫,૦૦૦+ અપેક્ષિત મુલાકાતીઓ

માઈક્રો એલેક્ટ્રોનિક્સ કારિયર્સ માટે વર્કફોર્સ ડેવલપમેન્ટ પેવેલિયન

**“SEMICON India** એકિઝબિશનમાં વૈશ્વિક સેમિકન્ડક્ટર વેલ્યુ ચેઇનમાંથી લગભગ ૩૫૦ પ્રદર્શકો, ૬ આંતરરાષ્ટ્રીય રાઉન્ડટેબલ્સ, ૪ કન્ડ્રી પેવેલિયન્સ, ૮ રાજ્યોની ભાગીદારી અને ૧૫,૦૦૦થી વધુ મુલાકાતીઓ સામેલ થશે, જે દક્ષિણ એશિયામાં સેમિકન્ડક્ટર અને ઇલેક્ટ્રોનિક્સ શોર્સનું સૌથી મોટું મંચ બની રહેશે,” એમ શ્રી એસ. કૃષ્ણન, સચિવ, **MeitY**એ જણાવ્યું. “ભારતનો સેમિકન્ડક્ટર ઉદ્યોગ એક મોટા પરિવર્તનના આરે છે, જ્યાં દેશની નીતિઓ અને ખાનગી શોર્સની શક્તિઓ સાથે મળીને ભારતને વૈશ્વિક મંચ પર અગ્રણી બનાવવા તત્પર છે.

# ‘सेमिकॉन इंडिया २०२५’चे पंतप्रधान मोदी करणार उद्घाटन

## ३३ देशांचे प्रतिनिधी, ५० पेक्षा अधिक जागतिक सीएक्सओ उपस्थित राहणार

■ मुंबई : भारताच्या सेमीकंडक्टर प्रवासाला नवीन उंचीवर नेण्यासाठी, देशातील सर्वात मोठे सेमीकंडक्टर आणि इलेक्ट्रॉनिक्स प्रदर्शन ‘सेमिकॉन इंडिया २०२५’ २ ते ४ सप्टेंबर दरम्यान नवी दिल्लीतील यशोभूमी येथे आयोजित केले जाईल. या भव्य कार्यक्रमाचे उद्घाटन पंतप्रधान नरेंद्र मोदी यांच्या हस्ते २ सप्टेंबर रोजी करतील.

या तीन दिवसांच्या जागतिक कार्यक्रमात ३३ देशांचे प्रतिनिधी, ५० पेक्षा अधिक जागतिक सीएक्सओ, ३५० प्रदर्शक आणि ५० पेक्षा जास्त आघाडीचे

■ या कार्यक्रमात ३५० पेक्षा जास्त प्रदर्शक, ६ आंतरराष्ट्रीय गोलमेज परिषद, ४ देशांचे मंडप, ९ राज्यांतील सहभाग आणि १५,००० पेक्षा जास्त अभ्यागत उपस्थित राहण्याची अपेक्षा आहे, असे एमईआयटीवाय सचिव एस. कृष्णन यांनी सांगितले.

■ आमच्या सदस्य कंपन्यांची कौशल्ये आणि क्षमता भारताच्या जागतिक वक्ते उपस्थित राहतील. या वर्षाची थीम ‘बिल्डिंग द नेक्स्ट सेमीकंडक्टर पॉवरहाऊस’

कार्यकारी अधिकारी अजित मनोचा यांनी व्यक्त केला.

■ सेमी इंडिया आणि आयईएसएचे अध्यक्ष अशोक चांडक यांनी भारताची देशातर्गत सोपणे आणि खासगी क्षेत्रातील क्षमता आता पूर्णपणे एकत्र आल्या आहेत. ‘सेमिकॉन इंडिया २०२५’ या बदलाचा सर्वात मोठा उल्लेख असेल, असे त्यांनी सांगितले.

प्रकल्पाना मंजुरी दिली आहे. सीसीटीव्ही, नेट्विगेशन सिस्टीम, मोटर कंट्रोलर्स, कम्प्युनिकेशन चिप्स आणि मायक्रोप्रोसेसर युनिट्ससारख्या गरजांसाठी देशातर्गत डिझाइन आणि उत्पादनाला प्रोत्साहन देणे, हे यामागील उद्दिष्ट आहे. अल्ट्राइड मटेरियल्स, आयबीएम, एएसएमएल, इन्फिनियन, केएलए, लॅम रिसर्च, मायक्रोन, सॅनडिस्क, सीमेन्स, एसके हायनिक्स, टाटा इलेक्ट्रॉनिक्स, टोकियो इलेक्ट्रॉन यासारख्या जगप्रसिद्ध कंपन्यांचे उच्च अधिकारी या कार्यक्रमात सहभागी होतील.

सेमीकंडक्टर वाढीला एक नवीन आयाम जोडतील. हा कार्यक्रम उत्तम नेटवर्किंग आणि व्यवसाय संधी आणेल, असा विश्वास सेमीचे अध्यक्ष आणि मुख्य

असून भारताला एक स्वावलंबी सेमीकंडक्टर राष्ट्र म्हणून स्थापित करण्याच्या दिशेने हे एक महत्वाचे पाऊल आहे. भारत सरकारने आतापर्यंत सेमिकॉन इंडिया कार्यक्रमातर्गत १० धोरणात्मक

#### HEADLINES OF THE DAY

## India's semiconductor market to cross \$100 billion by 2030, IESA

August 26, 2025

India's semiconductor market is poised for a transformational decade, with industry leaders projecting it to surpass \$100 billion by 2030. According to a report by the India Electronics and Semiconductor Association (IESA), the country could cater to nearly 8–10% of global demand, amounting to \$40 billion, if policy momentum and execution continue at pace.

Ashok Chandak, President of IESA, highlighted that India has already made significant progress under the Semicon India programme but stressed that the sector requires long-term support.

“It is very clear that the semiconductor industry is a long haul. One programme or a few years of efforts is just the beginning and a starting point... this programme needs to continue for an additional five to ten years minimum, so that it becomes more impactful and self-sustainable in the future,” he said.

Chandak underlined that the next phase, dubbed “Semicon 2.0,” must expand its scope. “The previous one was \$10 billion. Equal or more would be welcome, surely. And also the expectation is that this time, it could cover the wider range of topics, including the supply chains, particularly materials, chemicals, and gases.”

On the design front, Chandak pointed out that India already accounts for nearly 20% of the global semiconductor design workforce. He noted that more than 300 institutes now have access to electronic design automation tools under the government's design-linked incentive scheme, calling it “one of the world's largest government-supported programmes.”

Despite geopolitical uncertainties, Chandak maintained that India must adopt a balanced global approach.

“No country is able to fulfil 100% of its value chain and demand on its own. We need to establish proof points by executing our currently announced projects... and build interdependence with multiple countries,” he said, citing active interest from global players in the upcoming Semicon India 2025 event.

On capacity creation, Chandak revealed that 10 central government-approved projects and several state-supported initiatives are already underway. “All these projects put together, there is a capacity of about 80 million chips per day... at least three plants would be in pilot production this year,” he said, adding that full-scale operations could enable India to produce 70–72 million chips daily within the next two years. *CNBCTV18*

## Narendra Modi to Inaugurate SEMICON® India 2025 in New Delhi

25 August 2025 / Machine Edge Global

**New Delhi:** The fourth edition of SEMICON India 2025 will be officially inaugurated by Hon'ble Prime Minister Shri. Narendra Modi on 2nd September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi. Staying true to its legacy of positioning India as a global Semiconductor powerhouse, the fourth edition of SEMICON India 2025 will convene key stakeholders including global leaders, semiconductor industry experts, academia, government officials and students.

Under the Semicon India program, 10 strategic projects have been approved across high-volume fabs, 3D heterogeneous packaging, compound semiconductors (including SiC), and OSATs, marking a significant milestone for the country. Recognizing semiconductors as a foundational technology, over 280 academic institutes and 72 startups have been equipped with state-of-the-art design tools, while 23 startups have already been approved under the DLI scheme. These initiatives are driving innovations in critical applications such as CCTV systems, navigation chips, motor controllers, communication devices, and microprocessors—strengthening India's journey towards Atmanirbhar Bharat.

Accelerating India's semiconductor revolution, SEMI, the global industry association prompting the semiconductor industry and India Semiconductor Mission (ISM), Ministry of Electronics and Information Technology (MeitY), announced the programming for SEMICON India 2025 at a press conference held in the national capital today. Registration is OPEN.

Under the theme Building the Next Semiconductor Powerhouse, the event will offer valuable insights into innovations and trends in key areas such as Fabs, Advanced packaging, smart manufacturing, AI, supply chain management, sustainability, workforce development, Designs and Start Up's along with 6 country round tables.

### In Talks With Finance Ministry For Semicon 2.0: MeitY Secretary S Krishnan

*He announced that 10 projects have been cleared under India's Semiconductor Mission, and the country is set to welcome its first made-in-India chip this year.*

S. Krishnan, secretary of the Ministry of Electronics and Information Technology, informed in a press briefing that MeitY has begun discussion with the Finance Ministry for Semicon 2.0, the next phase of India's Semiconductor Programme.

He announced that 10 projects have been cleared under India's Semiconductor Mission, and the country is set to welcome its first made-in-India chip this year.

## SEMICON India 2025 to be South Asia's largest platform for semiconductor, electronics innovation: MeitY Secretary

**New Delhi, Aug 23 (IANS)** The SEMICON India exhibition will feature nearly 350 exhibitors from across the global semiconductor value chain, along with six country round tables, four country pavilions, participation from nine Indian states, and over 15,000 expected visitors, S. Krishnan, Secretary, Ministry of Electronics and Information Technology (MeitY) said on Friday.

"This will provide South Asia's single largest platform for showcasing the latest advancements in the semiconductor and electronics industries," he added. The fourth edition of SEMICON India will be inaugurated by Prime Minister Narendra Modi on September 2, at Yashobhoomi (India International Convention and Expo Centre), in the national capital.

The event will bring together global industry leaders, policymakers, academia, and students under the theme "Building the Next Semiconductor Powerhouse." India's semiconductor journey has gained momentum under the Semicon India Programme.

The government has already approved 10 projects in critical areas such as high-volume fabrication units (Fabs), 3D heterogeneous packaging, compound semiconductors, and outsourced semiconductor assembly and testing (OSATs).

In addition, design-focused initiatives have supported more than 280 academic institutions and 72 start-ups with advanced tools, while 23 start-ups have been approved under the Design Linked Incentive (DLI) scheme.

Ajit Manocha, President and CEO of SEMI, said the event will also offer global networking opportunities, business development platforms, and insights into technology and market trends.

"We are bringing the combined expertise of our member companies across the global design and manufacturing supply chain to help expand India's semiconductor ecosystem and strengthen supply chain resiliency," he said.

Ashok Chandak, President of SEMI India and IESA, added that India's semiconductor industry is at a breakthrough moment, with supportive policies and private sector capacity aligning to take the country to global prominence. Over three days, the flagship event will feature keynote addresses, panel discussions, fireside chats, paper presentations, and six international roundtables.

## Centre eases SEZ land norms to boost semiconductor and electronics manufacturing

India Electronics and Semiconductor Association and SEMI, the organiser of Semicon events including Semicon India, said that these reforms will make it significantly easier for companies to establish facilities and scale up production in India's high-tech manufacturing ecosystem

In a bid to push domestic manufacturing and export of semiconductors and electronics, the Union ministry of commerce and industries has amended the SEZ rules, easing contiguous land area norms for special economic zones (SEZs) that want to engage exclusively in the manufacturing of semiconductors or electronic components.

“Where a special economic zone is exclusively set up for the manufacturing of semiconductors or electronic components, the contiguous land area shall be 10 hectares or more,” the commerce ministry’s notification said. Earlier, this was 50 hectares.

## Hon'ble PM Shri. Narendra Modi to inaugurate fourth edition of SEMICON® India 2025

Bharat set to welcome delegates from 33 Countries, 50+ CXOs, 350 Exhibitors at country's biggest Semiconductors & Electronics Show in New Delhi from 2-4 September 2025

~ Over 50+ Eminent Global Visionary Speakers ~

~ Event To Highlight Robust Local Semiconductor Ecosystem Expansion and Industry Trends ~

The fourth edition of **SEMICON India 2025** will be **officially inaugurated by Hon'ble Prime Minister Shri. Narendra Modi** on 2<sup>nd</sup> September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi. Staying true to its legacy of positioning India as a global Semiconductor powerhouse, the fourth edition of SEMICON India 2025 will convene key stakeholders including global leaders, semiconductor industry experts, academia, government officials and students.

Under the Semicon India program, 10 strategic projects have been approved across high-volume fabs, 3D heterogeneous packaging, compound semiconductors (including SiC), and OSATs, marking a significant milestone for the country. Recognizing semiconductors as a foundational technology, over 280 academic institutes and 72 startups have been equipped with state-of-the-art design tools, while 23 startups have already been approved under the DLI scheme. These initiatives are driving innovations in critical applications such as CCTV systems, navigation chips, motor controllers, communication devices, and microprocessors—strengthening India's journey towards Atmanirbhar Bharat.

Accelerating India's semiconductor revolution, SEMI, the global industry association prompting the semiconductor industry and India Semiconductor Mission (ISM), Ministry of Electronics and Information Technology (MeitY), announced the programming for SEMICON India 2025 at a press conference held in the national capital today. **Registration is OPEN.**

## Hon'ble PM Shri. Narendra Modi to inaugurate fourth edition of SEMICON India 2025

**Delhi , AUGUST 25, 2025:** The fourth edition of **SEMICON India 2025** will be officially inaugurated by Hon'ble Prime Minister Shri. Narendra Modi on 2nd September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi. Staying true to its legacy of positioning India as a global Semiconductor powerhouse, the fourth edition of **SEMICON India 2025** will convene key stakeholders including global leaders, semiconductor industry experts, academia, government officials and students.

Accelerating India's semiconductor revolution, SEMI, the global industry association prompting the semiconductor industry and India Semiconductor Mission (ISM), Ministry of Electronics and Information Technology (MeitY), announced the programming for SEMICON India 2025 at a press conference held in the national capital today. Registration is OPEN.

Semicon India program initiatives strengthening India's journey towards '**Atmanirbhar Bharat**':

- 10 strategic projects approved across high-volume fabs, 3D heterogeneous packaging, compound semiconductors (including SiC), and OSATs
- Over 280 academic institutes and 72 startups have been equipped with state-of-the-art design tools with 23 startups being approved under the DLI scheme

## Hon'ble PM Shri. Narendra Modi to inaugurate fourth edition of SEMICON India 2025

**Delhi , AUGUST 25, 2025:** The fourth edition of **SEMICON India 2025** will be officially inaugurated by Hon'ble Prime Minister Shri. Narendra Modi on 2nd September 2025 at Yashobhoomi (India International Convention and Expo Centre), New Delhi. Staying true to its legacy of positioning India as a global Semiconductor powerhouse, the fourth edition of **SEMICON India 2025** will convene key stakeholders including global leaders, semiconductor industry experts, academia, government officials and students.

Accelerating India's semiconductor revolution, SEMI, the global industry association prompting the semiconductor industry and India Semiconductor Mission (ISM), Ministry of Electronics and Information Technology (MeitY), announced the programming for SEMICON India 2025 at a press conference held in the national capital today. Registration is OPEN.

Semicon India program initiatives strengthening India's journey towards 'Atmanirbhar Bharat':

- 10 strategic projects approved across high-volume fabs, 3D heterogeneous packaging, compound semiconductors (including SiC), and OSATs
- Over 280 academic institutes and 72 startups have been equipped with state-of-the-art design tools with 23 startups being approved under the DLI scheme
- Driving innovations in critical applications such as CCTV systems, navigation chips, motor controllers, communication devices, and microprocessors

Under the theme Building the Next Semiconductor Powerhouse, the event will offer valuable insights into innovations and trends in key areas such as Fabs, Advanced packaging, smart manufacturing, AI, supply chain management, sustainability, workforce development, Designs and Start Up's through high profile keynotes, panel discussions, fireside chats, paper presentations, 6 international roundtables and more.

### Event Highlights:

- 50+ eminent global visionary speakers
- 350+ exhibitors from across the global semiconductor value chain
- 6 international country roundtables & 4 country pavilions
- Participation from 9 Indian states
- 15,000+ expected visitors
- Workforce Development Pavilion highlighting microelectronics careers

# Semicon cos chipping away at IT, fresher hiring surges

Veena.Mani@timesofindia.com

**Bengaluru:** India is rapidly expanding its fresher hiring in the semiconductor sector, reflecting the nation's strategic push to establish itself as a global semiconductor powerhouse.

Companies are aggressively recruiting from engineering campuses—not just from IITs, but increasingly from tier-2 and tier-3 institutes—offering competitive salaries for roles in design, embedded systems, testing, and manufacturing.

Hiring spans the entire semiconductor lifecycle—from RTL/SoC design, verification, and embedded systems in R&D, to manufacturing roles like process engineering, packaging, and yield analysis. Opportunities in supply chain, testing, and business strategy are also growing, along with emerging roles in AI/ML hardware, hardware security, and sustainability.

Ashok Chandak, president of SEMI India and IESA, said the industry's momentum is driven by government initiatives like Semicon India, the design linked incentive (DLI), production linked incentive (PLI), and the Electronics Components Manufacturing Scheme (ECMS). Speaking at the Utkarsha Odisha Conclave 2025, Chandak emphasised the critical role of policy support and IESA member companies have committed

## CHIPS IN: HIRING SEES SHARP SHIFT

Experience	Roles/opportunities	Salary range (₹lakh/ annum)
Freshers	Design, embedded, testing	6-12
5-10 yrs	RTL, DFT, analog, process	15-35
Senior engineers	Physical design, verification lead	30-50
Architects (15-20 yrs)	AI/ML architect, SoC architect	60-100
Leadership roles	Fab/OSAT heads, design centre leads	120

Source: IESA

over \$21 billion in investments in just the past year.

"Alongside these, global supply chain realignments, growing demand from electronics, EVs, telecom, and defence, and a shortage of skilled chip and system design talent are driving growth in job creation across the value chain," he added.

Ashok Mittal, chancellor of Lovely Professional University (LPU), highlighted the rising demand for electronics and communication engineering (ECE) graduates, especially as top salary offers this year have gone to ECE students. "Employers are not only assessing technical expertise but also evaluating candidates' ability to learn quickly, multitask, and demonstrate leadership," he added. Each year, India's semiconductor industry hires around 12,000 freshers, according to Satya Gupta, president of the VLSI Society of India. "Last year, the number was lower—around

8,000—due to a market slowdown," he said. Still, college hiring accounts for nearly 10% of industry headcount growth, making it a vital talent source.

Internships now play a central role in hiring, with stipends ranging from Rs 40,000 to Rs 50,000 per month. While colleges report top placements in semiconductor roles, industry leaders caution that high salaries are partly due to a talent shortage—and may stabilise as more training programmes emerge.

At Birla Institute of Technology (BIT) Mesra in Ranchi, companies are offering salaries as high as Rs 20 lakh for select roles, as more students shift interest from IT to semiconductors. "The slowdown in the IT services space is making students consider the semiconductor sector for job opportunities, in addition to offering competitive salaries," said its Shraddha Shrivani, head of placements.

## India's semiconductor market to cross \$100 billion by 2030, IESA

August 26, 2025

India's semiconductor market is poised for a transformational decade, with industry leaders projecting it to surpass \$100 billion by 2030. According to a report by the India Electronics and Semiconductor Association (IESA), the country could cater to nearly 8–10% of global demand, amounting to \$40 billion, if policy momentum and execution continue at pace.

Ashok Chandak, President of IESA, highlighted that India has already made significant progress under the Semicon India programme but stressed that the sector requires long-term support.

"It is very clear that the semiconductor industry is a long haul. One programme or a few years of efforts is just the beginning and a starting point... this programme needs to continue for an additional five to ten years minimum, so that it becomes more impactful and self-sustainable in the future," he said.

Chandak underlined that the next phase, dubbed "Semicon 2.0," must expand its scope. "The previous one was \$10 billion. Equal or more would be welcome, surely. And also the expectation is that this time, it could cover the wider range of topics, including the supply chains, particularly materials, chemicals, and gases."

On the design front, Chandak pointed out that India already accounts for nearly 20% of the global semiconductor design workforce. He noted that more than 300 institutes now have access to electronic design automation tools under the government's design-linked incentive scheme, calling it "one of the world's largest government-supported programmes."

Despite geopolitical uncertainties, Chandak maintained that India must adopt a balanced global approach.

"No country is able to fulfil 100% of its value chain and demand on its own. We need to establish proof points by executing our currently announced projects... and build interdependence with multiple countries," he said, citing active interest from global players in the upcoming Semicon India 2025 event.

On capacity creation, Chandak revealed that 10 central government-approved projects and several state-supported initiatives are already underway. "All these projects put together, there is a capacity of about 80 million chips per day... at least three plants would be in pilot production this year," he said, adding that full-scale operations could enable India to produce 70–72 million chips daily within the next two years. *CNBCTV18*

## Chipping away at IT: Semiconductor cos see hiring surge

CHIPS IN: HIRING SEES SHARP SHIFT		
Experience	Roles/opportunities	Salary range (₹lakh/ annum)
Freshers	Design, embedded, testing	6-12
5-10 yrs	RTL, DFT, analog, process	15-35
Senior engineers	Physical design, verification lead	30-50
Architects (15-20 yrs)	AI/ML architect, SoC architect	60-100
Leadership roles	Fab/OSAT heads, design centre leads	120

Bengaluru: India is rapidly expanding its fresher hiring in the semiconductor sector, reflecting the nation's strategic push to establish itself as a global semiconductor powerhouse.

Companies are aggressively recruiting from engineering campuses—not just from IITs, but increasingly from tier-2 and tier-3 institutes—offering competitive salaries for roles in design, embedded systems, testing, and manufacturing.

This shift is realigning career aspirations, especially among students from core engineering branches.

Hiring spans the entire semiconductor lifecycle—from RTL/SoC design, verification, and embedded systems in R&D, to manufacturing roles like process engineering, packaging, and yield analysis. Opportunities in supply chain, testing, and business strategy are also growing, along with emerging roles in AI/ML hardware, hardware security, and sustainability. India's semiconductor market is projected to reach \$103 billion by 2030, serving as a foundation for its \$400 billion electronics sector.

Ashok Chandak, president of SEMI India and IESA, said the industry's momentum is driven by government initiatives like Semicon India, the design linked incentive (DLI), production linked incentive (PLI), and the Electronics Components Manufacturing Scheme (ECMS).

Speaking at the Utkarsha Odisha Conclave 2025, Chandak emphasised the critical role of policy support and IESA member companies have committed over \$21 billion in investments in just the past year.

"Alongside these, global supply chain realignments, growing demand from electronics, EVs, telecom, and defence, and a shortage of skilled chip and system design talent are driving growth in job creation across the value chain. Freshers in the semiconductor space are now being offered between Rs 6 to Rs 12 lakh per annum. IT services, on the other hand, give mostly Rs 3 lakh to Rs 4 lakh for fresh graduates," he added.

Ashok Mittal, chancellor of Lovely Professional University (LPU), highlighted the rising demand for electronics and communication engineering (ECE) graduates, especially as top salary offers this year have gone to ECE students. "Employers are not only assessing technical expertise but also evaluating candidates' ability to learn quickly, multitask, and demonstrate leadership," he added. Each year, India's semiconductor industry hires around 12,000 freshers, according to Satya Gupta, president of the VLSI Society of India. "Last year, the number was lower—around 8,000—due to a market slowdown," he said. Still, college hiring accounts for nearly 10% of industry headcount growth, making it a vital talent source.

A notable shift is the growing reliance on internships to onboard fresh talent. This approach provides hands-on chip design experience—crucial in semiconductors, where practical exposure outweighs theoretical tests. "In IT, companies often use hackathons to assess coding ability and problem-solving skills," Gupta explained. "But in semiconductors, students need exposure to real-world design environments to be truly industry ready."

## India's Independence Day Marks a New Era for Semiconductors

Bhubaneswar: Ashok Chandak, President IESA and SEMI India- A defining moment for India's technology journey-this Independence Day, the Hon'ble Prime Minister spoke about semiconductors from the iconic ramparts of the Red Fort. We applaud the vision and commitment of the Government of India and States, the India Semiconductor Mission, MietY , IESA and SEMI members, industry champions, Academia, Start Up's and every stakeholder who has worked relentlessly to bring us here. The journey ahead is even more exciting - building capabilities, driving innovation, and making India a trusted global semiconductor powerhouse. The momentum will further accelerate during SEMICON India 2025, from 2nd-4th September, in the presence of global CxOs driving the future of technology. And, made in India chips to be in production this year as 10 project of 22 Bn\$ worth Investment are in implementation. The future is being built in India.

## Karnataka Plans PCB Park in Mysuru Soon

State government aims to accelerate ESDM growth with new PCB Park and increased support for innovation initiatives

Ritesh Kumar · August 13, 2025

1 minute read

Karnataka's electronics and semiconductor sector may soon see a major boost, with the government considering the establishment of a dedicated Printed Circuit Board (PCB) Park in Mysuru. The development comes amid renewed efforts by the state to scale Global

Capability Centers (GCCs) and drive growth beyond Bengaluru.

During a high-level industry breakfast meeting attended by Karnataka Chief Minister, Deputy Chief Minister, and key industry leaders, **Sanjeev Kumar Gupta**, CEO of the [Karnataka Digital Economy Mission \(KDEM\)](#), highlighted the state's ambitious goals. *"The Honorable Chief Minister's vision to make Bengaluru the go-to destination for solving global challenges is perfectly aligned with the city's strengths in IT, innovation, and R&D," Gupta said.*

With over 18,000 startups and 50 unicorns, Bengaluru continues to lead India's innovation landscape. Gupta further emphasized the [government's plan](#) to add 500 new GCCs across Karnataka by 2029, with a strong focus on fostering growth in 'Beyond Bengaluru' clusters like Mysuru, Mangaluru, and Hubballi-Dharwad.

Karnataka's forthcoming IT policy, along with initiatives to build multiple Centres of Excellence (CoEs) and global innovation hubs, will support the state's larger vision of developing a \$20 billion [quantum economy](#) by 2035, he added.

**Ashok Chandak**, President of the India Electronics and Semiconductor Association (IESA) and SEMI India, also spoke at the event. He stressed the importance of accelerating Karnataka's ESDM (Electronic System Design and Manufacturing) momentum through [strategic initiatives](#).

*"IESA members are making significant contributions to Karnataka's ESDM sector. Our alliance with SEMI will bring global visibility to the state's electronics and semiconductor efforts," Chandak said.* He noted that IESA has made several key recommendations to the state government, including expediting the development of the proposed PCB Park in Mysuru, supporting IESA's STARTUP Mitra initiative, increasing [R&D funding](#), and fast-tracking electronics component manufacturing projects.

*"These measures are critical to driving innovation, manufacturing, and value creation across Karnataka," Chandak concluded.*

The proposed PCB Park, if approved, would be a significant milestone in Karnataka's mission to become a national leader in electronics manufacturing and semiconductor design.

## Mysuru may get PCB park soon

The Karnataka Chief Minister's ambitious plan to add 500 new GCCs by 2029 further solidifies the vision of scaling GCCs in the Beyond Bengaluru clusters.

During an industry breakfast meeting with the Hon'ble CM , Hon'ble Dy CM and Minister.

Karnataka, Sanjeev Kumar Gupta, CEO, KDEM, said: "The Honorable Chief Minister's vision to make Bengaluru the go-to destination for solving global challenges is perfectly aligned with the city's strengths in IT, innovation, and R&D. With over 18,000 startups and 50 unicorns Bengaluru is already shaping India's entrepreneurial future.

"The Chief Minister's ambitious plan to add 500 new GCCs by 2029 further solidifies our vision of scaling GCCs in the Beyond Bengaluru clusters. Karnataka's upcoming IT policy, new initiatives to build multiple CoEs and global innovation hubs will play a pivotal role in realizing this vision, and driving the state towards a \$20 billion quantum economy by 2035."

Ashok Chandak, President of IESA & SEMI India, noted: "IESA members are making a significant contribution to advancing Karnataka's ESDM sector. Through our alliance with SEMI, we are set to bring global visibility to Karnataka's electronics and semiconductor initiatives.

"We have recommended to the Government of Karnataka to expedite the PCB Park in Mysuru, support IESA's STARTUP Mitra initiative, allocate dedicated R&D funding, expedite electronics components projects and more -- all aimed at accelerating innovation, manufacturing, and value creation in the state."

## ಅಮೆರಿಕ ಸುಂಕ ಯುದ್ಧ; ಕೆಲ ದಿನ ದೇಶಕ್ಕೆ ಸವಾಲು

ಬೆಂಗಳೂರು: ಭಾರತದ ಮೇಲೆ ಶೇ.25ರಷ್ಟು ಸುಂಕ ವಿಧಿಸಲು ಮುಂದಾಗಿರುವ ಅಮೆರಿಕದ ತೀರ್ಮಾನ ದೇಶದ ಮೇಲೆ ತಾತ್ಕಾಲಿಕವಾಗಿ ಹೊರೆಯಾಗುವ ಸಾಧ್ಯತೆಯಿದೆ ಎಂದು ಐಇಎಸ್‌ಎ ಅಧ್ಯಕ್ಷ ಅಶೋಕ್ ಚಂದಕ್ ಹೇಳಿದ್ದಾರೆ.

ಈ ಬಗ್ಗೆ ಪ್ರಕಟಣೆ ಹೊರಡಿಸಿರುವ ಅವರು, ಭಾರತೀಯ ಸರಕುಗಳ ಮೇಲೆ ಅಮೆರಿಕ ಶೇ.25 ಸುಂಕ ವಿಧಿಸುವುದು ತಾತ್ಕಾಲಿಕವಾಗಿದೆ. ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ರಫ್ತುಗಳಿಗೆ ಅಲ್ಪಕಾಲದ ಸವಾಲಾಗಬಹುದು. ಇದರಿಂದ ಪೂರೈಕೆ ಸರಪಳಿಗಳಲ್ಲಿ ಅಡೆತಡೆಯಾಗಿ ಮತ್ತು ಬೆಲೆ ಸ್ಪರ್ಧಾತ್ಮಕತೆಯಲ್ಲಿ ಕುಂಠಿತ ಆಗಬಹುದು. ಮೂಲ ದರಕ್ಕಿಂತ ಶೇ.10ರಿಂದ 25ರಷ್ಟು ಸುಂಕವನ್ನು ಮುಂದುವರಿಸಿದರೆ, ಏಷ್ಯಾ

ದ ಇತರ ದೇಶಗಳಿಗೆ ಹೋಲಿಸಿದರೆ ಭಾರತಕ್ಕೆ ಯಾವುದೇ ಪ್ರಯೋಜನವಿಲ್ಲ ಎಂದು ಅಭಿಪ್ರಾಯ ಪಟ್ಟಿದ್ದಾರೆ.

ಪ್ರಸ್ತಾವಿತ ಸುಂಕಗಳಿಂದಾಗಿ ವಿಶೇಷವಾಗಿ ಸ್ಕಾರ್ಟ್ ಫೋನ್ ರಫ್ತುಗಳು ಸವಾಲುಗಳನ್ನು ಎದುರಿಸಬೇಕಾಗುತ್ತದೆ. ಆದರೂ, ಚೀನಾದಿಂದ ದೂರದಲ್ಲಿರುವ ತಮ್ಮ ಪೂರೈಕೆ ಸರಪಳಿಗಳನ್ನು ವಿಭಜಿಸುವ ಕಂಪನಿಗಳಿಂದ ಭಾರತ ಪಾರಾಗಬಹುದು. ಈ ಬೆಳವಣಿಗೆಯಲ್ಲಿ ಭಾರತದ ಎಲೆಕ್ಟ್ರಾನಿಕ್ಸ್ ಕ್ಷೇತ್ರದ ರಫ್ತು ಮಾರುಕಟ್ಟೆಗಳನ್ನು ವಿಭಜಿಸಲು, ದೇಶೀಯ ಮಾರುಕಟ್ಟೆಗಳನ್ನು ಬಲಪಡಿಸಲು, ಭಾರತೀಯ ಬ್ರಾಂಡ್ ಮತ್ತು ಉತ್ಪನ್ನಗಳನ್ನು ಅಭಿವೃದ್ಧಿಪಡಿಸಲು ಮತ್ತು ಬೆಲೆ ಆಧಾರಿತ, ಶುಲ್ಕದ ಭೀತಿಗೆ

ಒಳಪಟ್ಟಿರುವ ರಫ್ತುಗಳ ಮೇಲೆ ಅವಲಂಬನೆ ಕಡಿಮೆ ಮಾಡಲು ಮೌಲ್ಯ ಸರಪಳಿಯಲ್ಲಿ ಮೇಲ್ದರ್ಜೆಗೆ ಏರಿಸುವುದಕ್ಕೂ ಸಹಕಾರಿಯಾಗಲಿದೆ ಎಂದಿದ್ದಾರೆ.

ಸದ್ಯ ಭಾರತ ಹೆಚ್ಚು ಸೆಮಿಕಂಡಕ್ಟರ್‌ಗಳನ್ನು ತಯಾರಿಸುತ್ತಿಲ್ಲದ ಕಾರಣ, ತಾತ್ಕಾಲಿಕವಾಗಿ ಈ ಕ್ಷೇತ್ರವು ಪರಿಣಾಮಕ್ಕೆ ಒಳಗಾಗುವ ಸಾಧ್ಯತೆ ಕಡಿಮೆ. ಈ ಸಂದರ್ಭದಲ್ಲಿ ನಡೆಯುತ್ತಿರುವ ಅಂತಿಮ ವ್ಯಾಪಾರ ಸಂಧಾನಗಳು, ಮಾತುಕತೆಗಳು ಮುಂದಿನ ಕೆಲವು ವಾರಗಳು ಅಥವಾ ತಿಂಗಳಲ್ಲಿ ಸಕಾರಾತ್ಮಕ ಫಲಿತಾಂಶ ತರುವ ವಿಶ್ವಾಸವಿದೆ, ಏಕೆಂದರೆ ಎರಡೂ ದೇಶಗಳು ಉತ್ತಮ ಸಮತೋಲನ ಕಂಡುಕೊಳ್ಳಲು ಬಯಸುತ್ತಿವೆ ಎಂದು ಅಭಿಪ್ರಾಯಪಟ್ಟಿದ್ದಾರೆ.

# India's goods exports to US may fall 30% to \$60.6 billion in FY26

**SANGEETHA G.**  
CHENNAI, AUG. 1

India's goods exports to the US may come down by 30 per cent to \$60.6 billion in FY26. India's merchandise export performance is also projected to contract by 4 per cent in FY26.

While India has been charged with a 25 per cent tariff and threatened with an additional penalty. Inclusion of pharma and energy products in the list of goods with tariffs, will also affect India's exports.

GTRI suggest that India's merchandise exports to the US may come down by 30 per cent from \$86.5 billion in FY25 to \$60.6 billion in FY26. India's merchandise export performance is projected to contract by 4 per

cent in FY26 and compared to April 2025.

US tariff impact on India is likely to be at 0.3-0.4 per cent of GDP, finds Care Ratings.

India's \$10.7 billion textile exports will be badly hit as the competitors, including Bangladesh, Philippines, Vietnam have lower tariffs than India. Increased exports to the UK and European Union can mitigate some impact.

About \$9 billion valued pharmaceutical products

too will have to bear the brunt this time as they are not included in the list of products exempted from tariffs. A large portion of \$10 billion gems and jewellery exports and \$2 billion valued shrimp shipments will be affected.

Though semiconductors are exempted, Indian exports of chips are negligible, finds Ashok Chandak, president of India Electronics and Semiconductor Association.

Exports of electronic goods worth \$10 billion are being fuelled by mobile phone exports though they are also not spared.

Petroleum goods worth \$4.1 billion too will face intense competition. A sharp contraction in value of oil exports by around 15.5 per cent is expected.

## India's Electronics Exports Face Short-Term Disruption Amid U.S. Tariffs: IESA

*India does not have any major advantage compared to other Asian countries anymore if 25% tariff above baseline 10% is continued," he added.*

As the United States moves forward with the imposition of a 25% tariff on select Indian goods, the Indian electronics industry finds itself at a crucial inflection point. Industry leaders have expressed concern over the short-term disruption this measure may cause to India's fast-growing export momentum, particularly in the electronics and smartphone segments.

Mr. Ashok Chandak, President of the India Electronics and Semiconductors Association (IESA), commented on the development, stating that while the tariffs present a temporary setback, they also bring to light the broader need for strategic recalibration in India's electronics sector.
